A Look Back at What the Hinton Mills Team Did in April 2023

See more pictures of what the Hinton Mills team did this past month on Facebook

FAITH • FAMILY • FRIENDS • FARMING

Our team spent time supporting our current Commissioner of Agriculture (and candidate for Governor), Ryan Quarles, as well as a great candidate to fill the office of Ag Commissioner, Jonathan Shell. The primary election is coming up May 16 and we encourage you to make agriculture a priority when casting your votes. Regardless of who you vote for, take time to vote!

Birthdays are big at Hinton Mills! Grandma Ellora Hinton (pictured on the front), one of our founders, started the tradition of giving employees a paid day off on their birthday. Here's a look at a couple of birthday parties we had on location in April - for Dexter Barnes and Stephen Flynn.

Joe Fraley and Johnna Scott visited with students from across Kentucky at the annual University of Kentucky 4-H/FFA Field Day. There were 2,711 students at the field day.

Faith, Family, Friends, and Farming. If you stop by one of our locations, you often see that we are proud to put the "family" in family business. Jack and Annistyn, part of the 5th generation of Hinton Mills stopped by to check out the baby birds and the newsletter!

Johnna Scott from Hinton Mills Mt. Sterling, Justin Patton from Frank L. Hinton & Son, Stacey Vice, and Steve Richardson from Hinton Mills Cynthiana all took advantage of the nice weekend weather and enjoyed turkey season. Hinton Mills is proud to support our team and customers who are hunters, anglers, and outdoorsmen.

Feed HM260 Rumensin mineral to calves on pasture this summer for more gain per head per day!

We will no longer be grinding ear corn soon.

We are no longer grinding ear corn at May's Lick Mill and will cease this process at Jabetown Mill by fall. The economics of grinding ear corn has changed for both us and our customers growing corn. We are proud that we were able to grind customer ear corn as long as we did and we are one of the last mills to do so in Kentucky. The equipment we utilized for this process was over 50 years old. Ask our team about more economical and efficient feed options to meet your unique needs.
